Professional Summary

Full Stack Java Developer with hands-on experience in building scalable REST APIs and microservices-based applications using Spring Boot and React.js. Strong foundation in Data Structures, OOP, and system design principles. Skilled in developing efficient backend systems, optimizing performance, and delivering production-ready applications.

Education

Master of Technology (M.Tech) – Computer Science and Engineering
SR University, Warangal

2024 – 2026
CGPA: 9.4/10

Experience

Full Stack Java Developer Intern
Linkfields Innovations Pvt Ltd

Apr 2025 – Jun 2025

- Developed RESTful APIs using Spring Boot, improving backend scalability and response handling.
- Designed microservices-based modules enabling efficient service-to-service communication.
- Integrated multiple APIs, reducing data latency and improving system performance.
- Debugged and resolved application defects, enhancing system reliability.
- Containerized applications using Docker for consistent deployment across environments.

Technical Skills

- Languages:** Java, Python, JavaScript
- Frontend:** React.js, HTML, CSS
- Backend:** Spring Boot, REST APIs, Microservices
- Databases:** MySQL, MongoDB
- Tools:** Git, GitHub, Postman, JIRA, Docker
- Concepts:** Data Structures, OOP, SDLC, System Design Basics

Projects

Hotel Booking System (React + Spring Boot)

- Developed a full-stack web application enabling users to search, view, and book hotels in real time.
- Designed and implemented REST APIs for booking management, user authentication, and data handling.
- Integrated frontend (React) with backend services ensuring seamless data flow and UI responsiveness.
- Optimized backend queries, improving application performance and reducing response time.

Test Automation Framework (Java + Selenium)

- Built a reusable automation framework for executing end-to-end test cases across applications.
- Implemented modular architecture using design patterns, improving code maintainability.
- Automated repetitive testing workflows, significantly reducing manual testing effort.
- Integrated reporting mechanisms for tracking test execution and debugging failures.

API Testing for Microservices Application

- Designed and executed API test cases for validating microservices-based architecture.
- Ensured seamless communication between services by testing request-response cycles.
- Identified and resolved API-level issues, improving system reliability and data consistency.
- Used Postman and automated scripts to validate endpoints and improve testing efficiency.

Certifications

- Full Stack Java Development – Sathyam Technologies
- Advanced Data Structures in Java – Slayers

Achievements

- Secured 1st Prize in Technical Paper Presentation
